

TK 1– 8 'Mini Hybrid' Thermal Kits

System Comprises:

- 1–8 F11 or F11i fans and controllers
- Jacket water radiator
- Charge Air Cooler
- Integrated system master controller
- Steel fabricated enclosure

Applications:

- Bus and truck engine cooling up to 300kW engine
- Specialist equipment cooling
- Auxiliary or additional cooling loop
- Hybrid / electric vehicle power electronics cooling loop
- Integrated water jacket radiator and CAC in one package
- Fan reversal for easy cleaning

Benefits :

- Improved fuel efficiency by 5-15 %
- Improved power availability from engine
- Reduced size of cooling pack
- Diagnostic feedback
- Simplified installation
- Maintenance free
- Self cleaning through reversible fans
- Reduced noise
- Improved cooling capacity
- Flexible installation options remote from engine
